**With more than 600 participants every year, the European Pellet Conference held in Wels is the largest annual pellet event in the world!**

The European Pellet Conference offers a unique combination of events:

The event is held in the context of the annual "World Sustainable Energy Days" conference, organised by the OÖ Energiesparverband, the energy agency of Upper Austria. Upper Austria is an ideal location for such a conference: more than 25 % of all biomass boilers sold in the EU are manufactured by Upper Austria's boiler industry and pellet heating systems have become a standard solution.

The conference makes an important contribution to awareness raising about renewable energy.
